LA SPAZIALE S40 SUPREMA - DEMONSTRATION MODE

The La Spaziale Suprema S40 has a demonstration mode that is accessed through holding down the hot water button whilst switching the machine on. This means that the machine will light up, appearing as though it is on, but the boiler of the machine will not heat up and none of the machine's buttons will work.

Sometimes, the machine can be accidentally placed in this mode, which if not intentional, will make it appear that it is not working.

To exit this, switch the machine off at the front switch.

Hold down the hot water button.

Whilst holding down this hot water button, switch the machine back on using the front switch.

This should allow the machine to now heat up as normal and exit the demonstration mode.
